Senior .NET Developer

Seat Specification

Hi,

Thank you for your interest in our role.

Brightsparks is a full service creative agency specialising in behaviour change for social good.

Our values

We believe in the power of purpose-focused organisations as a force to bring about positive change for people and society.

That's why we exclusively work with social purpose organisations to help them achieve their goals.

We are looking for candidates who share our core company values including;

We:

- **Are ambitious** - the more organisations we work with, the more people we can help, the greater our social impact is.
- **Are brave** - We don't back away from challenges.
- **Are accountable** - We accept responsibility for our work, actions and impact and we expect the people and organisations we work with to do so too.
- **Have a great attitude** - We lead with kindness, optimism, enthusiasm and collaboration.
- **Act with integrity** - we are honest and have strong moral principles.
- **Big picture thinkers** - Are reflective of their own actions and can put the best interests of the company first.
- **Do good** - we have a positive impact on people and society

Our Approach

Market-leading Tools and Systems

We believe that social purpose organisations should be able to benefit from the same tools and systems used by Silicon Valley corporations. We use market-leading no-code and low-code products to provide future-proof, high quality solutions to help you achieve your aims.

Understanding How People Think

All our work is underpinned by evidence-based behavioural psychology. We use this psychology (known as Behavioural Science) to create campaigns, brands, systems and services that will reach and engage your target audiences, and nudge them towards behaviour change our clients want to achieve.

Living our Values

We reinvest our resources from Brightsparks Agency into our sister community interest company, Brightsparks CIC, so we can make even more of a difference.

How we work with our clients

We're Part of our Clients' Teams

We work collaboratively with our clients as an extension of their teams, supporting them to achieve their aims. They can count on us.

We get started as quickly as possible.

We know that the quicker we get up and running with a project, the quicker we can start making a difference to our client, and their service users. Our team all work at Brightsparks to make a difference, so you can guarantee we're very quick off the starting blocks.

Data is King.

We use data to guide decision making, not opinion.

We're passionate.

We only take on projects where we know we have the knowledge and expertise to deliver great outcomes. Equally, we only do projects that we're passionate about and where we can see how our work will have a positive social impact. Otherwise, what's the point?

We're honest.

If we think something's not going to work or we need to change approach, we say so. Even if it costs us money or involves us admitting we got it wrong. Brightsparks exists to make a positive difference and that always comes first.

Our Services

We have a huge toolkit of services, systems and approaches we can draw on to create a custom solution to achieve our client's aims. Our brilliant team work with our clients to understand what they want to achieve, and design a solution that will meet (or exceed) their objectives. Our services include: campaigns, strategy, creative, and digital.

What our staff say about working at Brightsparks Agency:

"I felt like part of the team even before I formally started working at Brightsparks - It's such a friendly and supportive environment where we're challenged to do our best every day but have a lot of fun whilst doing so! No two days are the same and I can honestly say that I genuinely enjoy every aspect of my role here."

"Honestly, I just really love working here! Not only are we a creative, solution orientated agency, but the work we do actually makes a difference to people's lives. I have ADHD and when I told Sian and Lizzie that I would be starting to take medication not long after starting to work here, they were both supportive and understanding. It seems like such a natural thing to accept people for different ways of thinking and processing information, but unfortunately that isn't always the case. Lots of companies throw buzzwords around nowadays like 'Empowering' and 'Inclusive' but at Brightsparks these aren't just 21st century boxes to tick - these are things that are instilled every day by the warmth and level of care the management team has for our work, our clients and us!"

"Leonie, Andy and Sian are the most approachable Senior Management team I have ever had the pleasure working for. As a result of that I come to work every day wanting to do the best possible work I can. The passion you all feel for what we do and can do for our clients make me so proud to say that I work for Brightsparks. Every day I come to work knowing that you are all available if I need help with anything and you all have a unique skill of keeping an eye on projects ready to give advice and help where it is needed which is both reassuring and helpful."

"With the above in mind, Lizzie is absolutely amazing! In our weekly meetings she reiterates Brightsparks rocks, clearly and concisely shares her expectations of the team for the week ahead and the rocks she has put in place for us and takes time to walk through our individual rocks that we have set for ourselves. In 10 years of meetings I have never felt as organised as I do when I leave our Monday Meeting. It is a great way to start the week as a team making sure we are all working towards the same goal and thanks to Lizzie's management style, it's a fantastic and comfortable open forum for questions and ideas."

"Not long after I started working at Brightsparks, a policy was put in place for carers. I live with my mum and dad because my dad has Alzheimer's and aphasia, he is also currently being assessed to see if he has ALS. Mum is the primary caregiver, and I live with them to support her when she needs respite. Having a family member with Alzheimers is emotionally and physically taxing and the fact that I work for a company that took the time to discuss and form a policy around care for carers is both forward thinking and inclusive."

"Working for Brightsparks is an absolute pleasure. The team are welcoming and friendly, the working environment is inclusive and flexible, and you are always made to feel like a valued team member with something to contribute."

In my role as a Junior Marketing Executive, I am happy to have gained many valuable skills and worked on some very exciting projects in such a short space of time.

"As an employer, their approach is fit for a 21st-century organisation, offering a humanistic approach where health and wellbeing always come first. If you are value-driven and tired of working within an out-of-date company model, I highly recommend applying to join the Brightsparks team."

Seat Specification

About Seats:

A seat describes a set of functions, actions or outcomes that a single person is responsible for leading on. The main difference between seats and more traditional job roles is that seats are not fixed arrangements. They are a representation of what the business needs now but also acknowledge that they may not be the functions that the business needs in 3 years or even in 3 months. It also acknowledges that the person sitting in the seat may change over time too.

Only one person can occupy a seat and be responsible for its functions. However, a single person can occupy multiple seats across the business if needed. The main point of the seats approach is to split out the functions and requirements that the business needs from the personal attributes of individuals which is often how job roles are created and specified. Instead this seat specification will make it clear both what functions of the seat and then who occupies in the seat will be decided by who best GWC (**G**ets It, **W**ants It and has the **C**apacity to deliver it) the seat.

How do we know if someone Gets the seat?

This is all about understanding the context behind the functions of a seat. You should ask yourself the following questions:

- Do I really understand the functions of the role at a fundamental level and why they are important to our business?
- Do I have enough experience to really understand what the outcomes of these functions look like and why they are important?
- Do I know what to expect when delivering the functions of the business?
- Do I have any examples of where I have delivered the functions of the seat successfully before?
- Could I hold my own in a conversation with someone else who gets the seat and provide ideas and solutions to achieve the seat functions?

How do we know if someone Wants the seat?

We want people that genuinely want to be in a particular seat rather than want a job. We know that if you are not motivated by what you are doing then you are not likely to do it well and both parties will be unhappy. So the questions to ask yourself are:

- Do you genuinely want this seat?
- Do you feel motivated by the functions of the seat?
- Could you see yourself being innovative and trying to continually improve your performance in the seat?

If the answer in no then your not in the right seat.

How do we know if someone has the capacity to deliver the seat?

This all about if someone has the technical knowledge, experience, personal skills, competencies and temperament to successfully deliver the seat functions. You should ask yourself the following questions:

- Do I have sufficient knowledge (usually from work experience) to effectively deliver the functions of the role.
- Have I done the functions of the role before and what aspects did I find more difficult than others?
- Would others (current or past colleagues) consider me to be at least proficient in the seat functions if not an expert?
- Have I had enough exposure to the seat functions to realistically be able to start delivering them straight away or at least within a short period of learning time (within 3 months)?

Seat Title: Senior .NET Developer

Brightsparks are looking to recruit a Senior .NET / C# Developer to lead a groundbreaking web project for the UK's Net Zero aspirations. For this project we will be creating a web based platform solution that encompasses the following three areas:

- A web platform that sells the Carbon Neutral proposition, overcoming any barriers to entry and informing users in a visual manner of all the information that they require.
- A web platform that will allow service users to create an account, be assigned an assistant to support them through the process, make selections and input specification requirements. Following this the users will also be able to see a selection of generated costs for a variety of options for their home and a range of finance options from providers for this
- Lastly, users will then be able browse a range of supplier/installer options to fit their custom built solution and be able to track the progress of their application throughout.

For the purposes of this specification the seat will be described as a single seat but in the future may be separated depending on the business needs at the time.

Seat Functions:

1. To lead the technical construction of this web platform for the agency that includes all the complex functions outlined in the project documentation
2. To work with the project team to deliver all the project requirements and a site that is visually appealing and works effectively.
3. To provide effective leadership, management and accountability (LMA) to a varied team of staff and contractors as required.
4. To support on any technical development documentation as and when required
5. To work on and provide consultancy on other digital projects being delivered by Brightsparks.

Seat KPIs:

1. To deliver a web build that successfully incorporates all the complex functions that this project requires.
2. Attention to detail with a focus on delivering high-quality software solutions.
3. To build a platform that is visually appealing to users and delivers the message in a dynamic and interactive way.
4. To complete the project within the agreed scope and timeline for delivery.
5. The bespoke platform will need to meet all additional requirements including SEO, Core Web Vitals and Accessibility specifications.

Areas of significant control:

1. The end to end development of this web project alongside the development strategy and methodology.
2. Maintain a high level of performance meeting agreed targets and KPIs.
3. Working closely with others with strong communication and interpersonal skills for effective collaboration with team members and stakeholders
4. To ensure all development documentation and best practice is kept up to date.

Minimum Postholder Requirements

- Bachelor's degree in Computer Science, Software Engineering, or related field.
- 5+ years of software development experience using C#, .NET, HTML, JS & CSS.
- Experience as lead developer on a range of complex web based projects.
- Experience with API Integration and complex database experience.
- Experience working collaboratively with colleagues as part of a project team.
- Strong problem-solving skills and the ability to navigate technical challenges.
- Experience in Full Stack development and creating end-to-end workflows
- Ability to work in an agile methodology for a project

Additional Postholder Requirements

- Experience in .NET CMS solutions e.g Umbraco, Kentico, Orchard, etc, as well as custom CMS creation
- Understanding of server specifications and requirements
- Experience of low code no code front end solutions

Hours:

Brightsparks operates a typical 35 hour working week. However, the post holder may be required to work up 48 hours in any given week if required to fulfil the requirements of the seat. Any additional hours worked will not incur additional payment and will not accrue time off in lieu.

Salary Range

Depending on experience advertised at £50,000 - £65,000

Contract:

This is a fixed term 2 year contract in the first instance (to 31st March 2026) with scope for it to become permanent dependent on future funding.

Location:

Hybrid working with requirement to work from York City Centre Office as well as home.

Reporting to:

Managing Director

Further Details

This seat specification is correct as at the date it is advertised. However, Brightsparks has the right to alter the seat specification at any time, in line with the demands and needs of the business.

Whilst this seat specification sets out the broad responsibilities of the seat, this is not intended to be an exhaustive list of responsibilities and the seat holder may be required to deliver any other responsibilities requested in line with the demands and needs of the business.
